Managed services

ENSURING NON-STOP PROTECTION

Pentesec's UK based managed security operations centre (SOC) provides 24/7 support with our Defender as a Service and Microsoft SIEM as a service products.

DEFENDER AS A SERVICE

For securing your Microsoft data, accounts and devices, our Defender XDR service is a fully managed offer which includes incident management for the full Microsoft Defender Suite, as well as end-end configuration management for Defender for Office (DfO) and Defender for Endpoint (DfE).

You get:

- Incident management
- Configuration management
- Vulnerability management
- Security advisories and reporting
- Attack simulation and phishing awareness

SIEM AS A SERVICE

For those who require an **extra level of protection**, Microsoft SIEM as a service is a modern SecOps service powered by Microsoft Sentinel. As well as the protection offered by Defender as a Service, SIEM will secure your end to end infrastructure, network data, applications and more.

You get:

- **Gold standard** of enterprise-grade security
- **Detection** – the latest in machine learning and Artificial Intellligence to automatically detect incidents
- **Investigation** – dedicated security analysts can provide forensic investigation and reporting
- **Reponse** – custom automations and playbooks created by our experts to enhanced response times
- **Threat hunting** – pro-active detection of anomalous behaviour based on the latest threat intelligence
